EXPERIENCE

Architect & Team Lead (Started as FrontEnd Developer)

Feb 2020 – Present

Tradexa Technologies Pvt Ltd

Pune, India

- Led execution for **Hyperinventory**, a modular omnichannel e-commerce platform, driving adoption across multiple client verticals.
- Spearheaded transition from monolithic to cloud-native microservices using AWS Lambda and Step Functions, resulting in improved uptime and scalability.
- Built and scaled a marketing automation engine using serverless architecture (WhatsApp, SES, SMS), leading to increased conversion from abandoned carts.
- Delivered key integrations including Bajaj Finserv payment gateway (50% growth contribution), accounting software (Tally, Zoho), and product sync to Facebook/Google Shopping via DynamoDB.
- Launched advanced platform features including dynamic shipping/payment charges logic, offer engines, and ElasticSearch-based product aging reports (3x faster insights).
- Instituted company-wide DevOps practices including streamlined CI/CD, monitoring, and real-time alerting to improve deployment speed and reliability.
- Engineered a fully serverless automated domain provisioning system using **AWS Lambda, DynamoDB, Route 53**, and **ACM** to streamline client onboarding, enabling instant custom domain mapping with automated SSL certification.
- Mentored a 10+ member engineering team, fostering a culture of ownership, rapid iteration, and technical excellence.

Frontend Developer (Intern)

6 Months

1Rivet

Valsad, India

- Built Single Page Applications (SPAs) with Angular; implemented lazy loading, change detection, and MVP design patterns.
- Utilized RxJS for reactive forms, typeahead functionalities, data synchronization, and UI responsiveness.
- Delivered a production-ready frontend integrated with a .NET backend for employee operations.

PROJECTS

Mera Brand | *Python, Django, Angular, AWS*

- Engineered a full-fledged Real Estate CRM designed to centralize lead management and build personal branding for developers.
- Developed features to maximize online visibility and SEO, ensuring high discoverability for user profiles.
- Implemented a modular architecture to handle end-to-end lead tracking and analytics.

Event Handler | *Python, SQL, REST APIs*

- Developed a community-focused event management system to handle frequent high-volume registrations.
- Implemented custom registration logic allowing for unique invite links and automated attendee tracking.
- Built a transparent "Lucky Draw" feature using randomization algorithms to automate winner selection during events.

Mera Job | *Python, Google Sheets API, Web Automation*

- Created a social-impact solution streamlining resume generation for blue-collar workers via Google Forms integration.
- Automated the creation of personalized profile links that render shareable digital resumes.
- Integrated direct "Click-to-Call" and WhatsApp APIs to reduce friction between employers and job seekers.

TECHNICAL SKILLS

Languages & Backend: Python, Django, JavaScript, TypeScript, SQL (Advanced), REST APIs

Databases: PostgreSQL, DynamoDB, Elasticsearch

Cloud & DevOps: AWS (Lambda, EC2, S3, CloudFront, Step Functions, IAM, SQS, RDS), Git, Bash, CI/CD, Monitoring

Frontend: Angular, NgRx, RxJS, HTML5, CSS3, Bootstrap

Methodologies: Agile, System Design, Data Sync, API Integrations

EDUCATION

Sinhgad Academy of Engineering <i>B.E. Electronics & Telecommunication (First Class with Distinction)</i>	Pune, India 2017
Pirojsha Godrej Junior College <i>HSC Computer Science</i>	Bordi, India 2013
