EXPERIENCE

Full Stack Developer

Feb 2020 – Present

Tradexa Technologies Pvt Ltd

Pune, India

- Develop and maintain scalable full-stack applications using Angular and Django Rest Framework.
- Led execution for **Hyperinventory**, a modular omnichannel e-commerce platform, driving adoption across multiple client verticals.
- Architected a comprehensive serverless marketing platform supporting Email, SMS, and WhatsApp with WebSocket-based real-time chat and automated lead generation logic.
- Developed a **GenAI-powered serverless SEO service** to automate product keyword generation and launched advanced features including dynamic offer engines and Elasticsearch-based aging reports.
- Spearheaded **AI-native development** by driving **Cursor** adoption; defined repository context rules (.cursorsrules) and prompt engineering standards to accelerate delivery cycles.
- Engineered a **Database Optimization Agent (POC)** utilizing LLMs to analyze query logs and autonomously suggest index strategies and schema improvements.
- Delivered integrations for payment gateways (Bajaj Finserv), accounting (Tally, Zoho), and Google Shopping sync with robust error pipelines for failure detection.
- Engineered a fully serverless automated domain provisioning system using cloud services to streamline client onboarding.
- Mentored a 10+ member engineering team, fostering a culture of ownership, rapid iteration, and technical excellence.

Frontend Developer

2018 – 2019

Mebooks

Remote/India

- Architected and developed **Android applications**, focusing on responsive UI/UX and seamless mobile performance.
- Integrated **Machine Learning APIs** to provide intelligent features and automated content processing within the mobile ecosystem.

Programmer Analyst Trainee

2018

Cognizant Technology Solutions

Chennai, India

- Underwent intensive technical training on **Java Enterprise Applications** and **SQL** database management.
- Aced all training milestones and capstone projects, demonstrating proficiency in Object-Oriented Programming (OOP) and relational schema design.
- Developed mock full-stack modules during the training phase, focusing on backend logic and database connectivity.

Frontend Developer (Intern)

6 Months

1Rivet

Valsad, India

- Built production-ready SPAs using **Angular** and **RxJS**, implementing lazy loading, reactive forms, and MVP patterns integrated with a .NET backend.

PROJECTS

Mera Brand | *Python, Django, Angular, AWS*

- Engineered a modular Real Estate CRM to centralize lead management and analytics, optimizing SEO for user profile discoverability.

Event Handler | *Python, SQL, REST APIs*

- Developed a high-volume community event system with custom invite logic and a transparent randomization algorithm for lucky draws.

Mera Job | *Python, Google Sheets API, Web Automation*

- Created a social-impact tool automating digital resume generation via Google Forms, featuring direct WhatsApp/Call integrations for blue-collar workers.

TECHNICAL SKILLS

Languages & Backend: Python, Django, JavaScript, TypeScript, SQL, REST APIs, **Prompt Engineering**
Databases: PostgreSQL, DynamoDB, Elasticsearch, Vector Stores
Cloud & DevOps: AWS (Lambda, EC2, S3, CloudFront, Step Functions, SQS, RDS), Git, CI/CD, **LLM Integration**
Frontend: Angular, React.js, NgRx, RxJS, HTML5, CSS3, Bootstrap
Methodologies: Agile, System Design, AI-Assisted Development (Cursor), Data Sync

EDUCATION

Sinhgad Academy of Engineering	Pune, India
<i>B.E. Electronics & Telecommunication (First Class with Distinction)</i>	<i>2017</i>
Pirojsha Godrej Junior College	Bordi, India
<i>HSC Computer Science (First Class with Distinction)</i>	<i>2013</i>
