+91 7066399254 | nuralikhoja@gmail.com | <https://www.linkedin.com/in/nurali-khoja-932200a0/>
Pune, MH

Summary

Experienced Engineering Lead with 5+ years in software development, growing into an architect and team lead role. Skilled in building and guiding teams, with strong experience in full-stack development (Python/Django, Angular, AWS) and system design. I enjoy planning new features, improving system scalability and maintainability, and fixing technical issues to help the business.

Work Experience

****Tradexa Technologies Pvt Ltd**** | Pune, MH

****Full Stack Developer (Evolved to Architect & Team Lead)**** | February 2020 – Present

- * Evolved from a foundational Full Stack Developer to an architect-level position, instrumental in building and mentoring a high-performing team of 5+ frontend and backend engineers. Spearheaded the end-to-end design, development, and deployment of "Hyperinventory," a greenfield omnichannel e-commerce platform on AWS (Angular, Django).

- * Architected and executed the migration of core platform services from a monolithic architecture to scalable, cloud-native microservices (AWS Lambda, Step Functions), significantly reducing database load and application downtime.

- * Championed full-stack performance excellence: optimized backend SQL query efficiency, achieved sub-20ms first-page render times via CloudFront, and dramatically increased bulk data import speeds by 3x.

- * Designed, built, and migrated a smart marketing automation platform to a serverless architecture, integrating Meta Whatsapp, Email (AWS SES), and SMS APIs, and implementing an abandoned cart recovery system that lifted conversions.

- * Engineered robust and scalable integrations for critical third-party systems: multiple payment gateways (including Bajaj Finserv, contributing to 50% Growth), accounting software (Tally, Zoho with advanced error handling & resync logic), and key e-commerce channels (Facebook Catalog, Google Shopping via efficient DynamoDB/Lambda queues).

- * Delivered a suite of complex e-commerce features, including dynamic shipping/payment method charges, a versatile product offers engine, a revamped credit payment system with customer-specific limits, and sophisticated product aging reports using Elasticsearch with an optimized indexing pipeline, improving search/report speed by 3x.

- * Established and managed comprehensive DevOps practices across the company, built CI/CD pipelines with Bash scripting for streamlined deployments, oversaw AWS resource optimization (EC2, S3, IAM), developed proactive monitoring and alerting systems (leveraging DynamoDB and custom email pipelines), and resolved critical concurrency bugs and inventory calculation errors, ensuring data integrity.

****1Rivet**** | Valsad, India

****FrontEnd Developer (Intern)**** | 6 months

- * Contributed to Single Page Applications (SPAs), implementing strategies such as Change Detection, Lazy Loading, and MVP design patterns to optimize application performance.
- * Utilized RxJS for features like typeahead functionality, reactive form error handling, data manipulation, and auto-refresh capabilities.
- * Developed a production-ready Angular frontend for employee operations (e.g., resignation process), integrating with a .NET backend and SQL Database.

Skills

- * **Programming Languages:** Python, JavaScript (ES6+), TypeScript, SQL (Advanced, Query Optimization)
- * **Backend Development:** Django, RESTful APIs, Payment Gateway Integration, Third-Party API Integration (Meta, Email/SMS Gateways, Tally, Zoho)
- * **Frontend Development:** Angular, NgRx, RxJS, HTML5, CSS3, Bootstrap
- * **Databases:** PostgreSQL, NoSQL (DynamoDB, Elasticsearch)
- * **Cloud & DevOps:**
 - * **AWS:** EC2, Lambda, S3, CloudFront, API Gateway, Step Functions, DynamoDB, Elasticsearch Service, IAM, SQS (if applicable), RDS (if applicable), VPC, Route 53 (if applicable)
 - * **Tools & Practices:** Git, GitFlow, Bash Scripting, Monitoring & Alerting
- * **Other Technologies & Concepts:** Agile Methodologies, System Design, Data Synchronization, Error Reporting Pipelines, Competitive Programming

Projects

- * **Hyperinventory - Omnichannel E-commerce Platform** (Professional Project at Tradexa Technologies Pvt Ltd)
 - * Architected and developed a large-scale, greenfield e-commerce platform from the ground up, serving as a Full Stack Developer.
 - * Key responsibilities included full lifecycle development using Angular (Frontend) and Django (Backend), with extensive use of AWS services for scalability and performance (e.g., Lambda, Step Functions, DynamoDB, EC2, CloudFront, Elasticsearch).
 - * Focused on building a robust, modular system involving microservice migration, third-party API integrations (marketing, payment gateways, accounting software), advanced reporting, and comprehensive DevOps management.
 - * Refer to Work Experience at Tradexa Technologies Pvt Ltd for detailed accomplishments and specific contributions.*

Education

- * **BE Electronics and Telecommunications** | First Class with Distinction
Sinhgad Academy Of Engineering, Pune | 2017

****HSC Computer Science**** | First Class with Distinction
Pirojsha Godrej Junior College, Bordi | 2013
