EXPERIENCE

Architect & Team Lead (Started as Frontend Developer)

Feb 2020 – Present

Tradexa Technologies Pvt Ltd

Pune, India

- Led execution for **Hyperinventory**, a modular omnichannel e-commerce platform, driving adoption across multiple client verticals.
- Architected a comprehensive serverless marketing platform supporting Email, SMS, and WhatsApp with WebSocket-based real-time chat. Automated lead generation from WhatsApp queries and engineered a configurable abandoned cart service with custom payloads and timing logic.
- Delivered key integrations including Bajaj Finserv payment gateway (50% growth), accounting software (Tally, Zoho), and product sync to Facebook/Google Shopping with robust error pipelines for failure detection and automated retries.
- Launched advanced platform features: dynamic shipping/payment charges logic, offer engines, and Elasticsearch-based product aging reports (3x faster insights).
- Engineered a fully serverless automated domain provisioning system using cloud services to streamline client onboarding.
- Implemented Generative AI features to automate copywriting tasks and spearheaded the adoption of agentic coding best practices, significantly accelerating development cycles.
- Mentored a 10+ member engineering team, fostering a culture of ownership, rapid iteration, and technical excellence.

Frontend Developer (Intern)

6 Months

1Rivet

Valsad, India

- Built production-ready SPAs using **Angular** and **RxJS**, implementing lazy loading, reactive forms, and MVP patterns integrated with a .NET backend.

PROJECTS

Mera Brand | *Python, Django, Angular, AWS*

- Engineered a modular Real Estate CRM to centralize lead management and analytics, optimizing SEO for user profile discoverability.

Event Handler | *Python, SQL, REST APIs*

- Developed a high-volume community event system with custom invite logic and a transparent randomization algorithm for lucky draws.

Mera Job | *Python, Google Sheets API, Web Automation*

- Created a social-impact tool automating digital resume generation via Google Forms, featuring direct WhatsApp/Call integrations for blue-collar workers.

TECHNICAL SKILLS

Languages & Backend: Python, Django, JavaScript, TypeScript, SQL (Advanced), REST APIs

Databases: PostgreSQL, DynamoDB, Elasticsearch

Cloud & DevOps: AWS (Lambda, EC2, S3, CloudFront, Step Functions, IAM, SQS, RDS), Git, Bash, CI/CD, Monitoring

Frontend: Angular, NgRx, RxJS, HTML5, CSS3, Bootstrap

Methodologies: Agile, System Design, Data Sync, API Integrations

EDUCATION

Sinhgad Academy of Engineering

Pune, India

B.E. Electronics & Telecommunication (First Class with Distinction)

2017

Pirojsha Godrej Junior College

Bordi, India

HSC Computer Science (First Class with Distinction)

2013
